Projects

FT_TRANSCENDENCE

ft_transcendence is an exciting project aiming to build an immersive website for the renowned Mighty Pong contest. The goal is a feature-rich hub for participants, spectators, and organizers.

WEB SERVER

Webserv is a project to create your own HTTP server, delving into web mechanisms and protocols. It's hands-on and offers insights into web server development and client communication.

INCEPTION

The "Inception" project enhances system administration skills using Docker. It involves virtualizing multiple Docker images within a personal virtual machine to explore containerization.
